

Professional Grade
SUB-SURFACE
Odor Counteractant

FORMULA

#2005

Contains Airicide®

**CLEANER, RESTORER,
BURNISHING BASE
FOR FLOORS**

Spray buffing is out and there is no longer the need for separate products and separate operations for cleaning and burnishing floors. Now one product – RX2005 – cleans and in the same operation leaves the ideal base for burnishing. Using less product and fewer water changes, RX2005 cleans floors faster and better than any detergent you've ever used, yet it doesn't strip the remaining clean, good finish. RX2005 polishes easily to a higher gloss with greater slip resistance than you've seen

before. RX2005 does so using less product, fewer pads, less lost time and less working time, therefore accomplishing significant cost savings.

In addition, RX2005 is the only product in its class that contains our proprietary odor counteractant, Airicide®. With the regular use of RX2005, not only will your floors look great but it will deodorize the areas in which it is used.

Description

Removes embedded soil without removing finish. The flocculant additives cause soil to drop to the bottom of the bucket, allowing the solution to be used over and over. Dries to a clear invisible film that buffs to a durable, highly slip resistant, sensational gloss.

Uses

1. Cleans and prepares floors for applying new coats of finish. 2. Prepares floors for burnishing. 3. Acts as a burnishing compound to restore the finish and improve its gloss. 4. Improves slip resistance.

CLEANER, RESTORER, BURNISHING BASE FOR FLOORS

Benefits

- SELECTIVE DETERGENCY – RX2005 effectively removes heavy soil, but is uniquely formulated not to touch the finish that is still serviceable – in many cases replacing the need for stripping.
- SELECTIVE PENETRATION – Removes soil adhering to the finish without affecting the finish itself.
- USE LESS CLEANER & WATER – Dirt picked up in the bucket does not mix with cleaner solution. Instead, dirt falls to the bottom of the bucket, allowing the solution to be used over a far greater area.
- SAVES VALUABLE TIME – Eliminates hours of time otherwise wasted taking buckets and automatic scrubbers to remote locations to dump and reload.
- HIGHLY CONCENTRATED – RX2005 is several times the strength and effectiveness of ordinary cleaners. It's too good to waste and is packed in patented measure bottles that provide precise dilution.
- CONTAINS AIRICIDE® – We've added Airicide odor counteractant to the otherwise odorless formulation to erase any unpleasant odors that might be already in the air.
- DOES TWO JOBS AT ONCE – Whereas other burnishing compounds don't clean well and other cleaners aren't burnishing compounds, RX2005 both cleans and polishes in one operation.
- ECONOMICAL – Material costs less than 5 cents per 100 sq. ft. Saves many times that in labor.
- BUFFS TO A SUPER GLOSS – Burnishing the RX2005 film produces the ultimate in "wet-look" gloss.
- SLIP RESISTANCE – Exceeds Underwriters Laboratories (UL) and ASTM standards for slip resistance.
- RESTORES APPEARANCE – Brightens colors and whitens whites to make old floors look new again.
- NO BUILD UP – Each application removes the previous application and leaves a perfectly clear, glass-like film that won't darken or discolor.
- REPLACES SPRAY BUFFING – An easier, faster system. No spray to damage the floor machine's internal parts, or to build up as a dirty deposit on the exterior of the machine.
- PADS STAY CLEANER – Pads don't glaze over as with spray buffing. Dirt picked up in the pad rakes out easily.
- EASY TO USE – Low foam. Applies easily with mop and bucket or an automatic scrubber.
- IMPROVES ANY GOOD FINISH – We recommend you use RX2005 with the Airx odor controlled floor care system, but it works great with any good finish.

Directions

Floors will respond best to cleaning and burnishing with RX2005 if there is a base built up with a product such as RX2002 Odor Controlled Floor Finish. However, RX2005 will improve the performance of any finish.

PREPARATION: Dust mop to remove loose dirt, then use RX2005 as you would an ordinary cleaner.

FOR RELATIVELY CLEAN FLOORS: Damp mop with 1 oz. RX2005 per gallon of water. Do not rinse. If some marks are not removed, continue mopping, then go back over spots after RX2005 has had time to penetrate.

TO LIGHT SCRUB: Dilute approx. 2 oz. per gallons in bucket or solution tank. Apply and scrub with red pad. Do not rinse. Allow to dry, then buff.

TO DEEP SCRUB: Dilute as above, but use green pad and double pass if using an automatic scrubber.

TO BURNISH: Allow floor to dry, then dry buff with red or lighter colored pad under a high speed machine.
