

Professional Grade
SURFACE
Odor Counteractant

FORMULA

#101

Contains Airicide®

AIRx[®]

ALL PURPOSE NO FILM CLEANER

Super Concentrate • No Phosphate
No Butyl • No Film • No Rinse

Many liquid cleaners start as blends of powders that are dissolved and liquified. Because they start as powders, they dry to powders to leave a dulling film. RX101 is different. It is a highly concentrated complex of LIQUID surfactants that are completely free-rinsing. It's ideal for all cleaning, but especially the maintenance of "wet-look" floors where it will not dull the finish. Only 1/2 oz. per gallon of water handles many cleaning jobs. Contains no

phosphates or other builders that leave a dulling film. Cleans floors, walls, woodwork, plastics, furniture, appliances, vehicles, etc. RX101 contains Airicide® Odor Counteractant to deodorize as it cleans. RX101 lifts heavy soil without etching the finish or leaving a film. With RX101 you use less product, less effort, do a better cleaning job and enjoy an extra bonus of eliminating unpleasant odors.

Description

RX101 is a liquid, all-purpose cleaner with unique abilities in cleaning, free-rinsing and deodorizing. It is 100% synthetic for better removal of greasy, oily soil. It is highly chelated and made of liquid surfactants rather than powders to avoid leaving a film. RX101 also contains Airicide® Odor Counteractant to leave areas fresh smelling wherever it is used.

Uses

For no film, no rinse cleaning of polished and unpolished floors including vinyl, vinyl asbestos, asphalt tile, rubber, marble, terrazzo, ceramic tile and concrete. Cleans walls, woodwork, partitions, glass, wood, metal, leather and plastic furniture, bathroom and shower room walls, fixtures, etc. For washing automobiles, buses, trucks, etc. Counteracts unpleasant odors as it cleans.

ALL PURPOSE NO FILM CLEANER

Super Concentrate • No Phosphate
No Butyl • No Film • No Rinse

Benefits

NO FILM FROM BUILDERS - Completely free-rinsing. Ideal for cleaning “wet-look” floors and other high gloss surfaces where the film from other cleaners can be obvious.

NO SOAP FILM - 100% synthetic. Contains no soap so there can be no soap film even when used in the hardest water.

HIGHLY CHELATED - Ensures against film from hard water, even removes film left by previously used cleaners.

HIGHLY CONCENTRATED/HEAVY DUTY CLEANER - 1/2 ounce per gallon of water is all that’s necessary for many uses.

CONTROLLED CLEANING - Removes heavy soil without removing or cutting into the finish or wax.

CONTAINS Airicide® - Counteracts unpleasant odors as it cleans.

TRULY ALL PURPOSE - Use with a mop, sponge, trigger spray bottle, pressure washer or automatic scrubber to clean anything non-electrical.

Directions

May be used in either hot or cold water. For damp mopping of polished floors and the cleaning of non-porous surfaces, use approximately 1/2 ounce per gallon of water. For removal of typical soil from non-polished floors, from walls, woodwork, etc., use approximately 1 ounce per gallon of water. For heavier or greasy soil, use approximately 2 ounces per gallon of water. Only food contact surfaces need be rinsed with potable water.

Specifications

ODOR COUNTERACTANT	Airicide®
pH OF CONCENTRATE.....	10.5 ± 0.5
pH OF 1:128 DILUTION.....	8.0 ± 0.5
